 "Architrend办公楼", 拉古萨, 西西里, 意大利

该建筑采用钢筋混凝土结构，并以玻璃覆盖，是现代建筑的一个典型案例，具有新巴洛克式、新摩尔式、西班牙和葡萄牙建筑特点。宽大的外挑结构保护建筑四周的窗户免受太阳光的强烈照射。

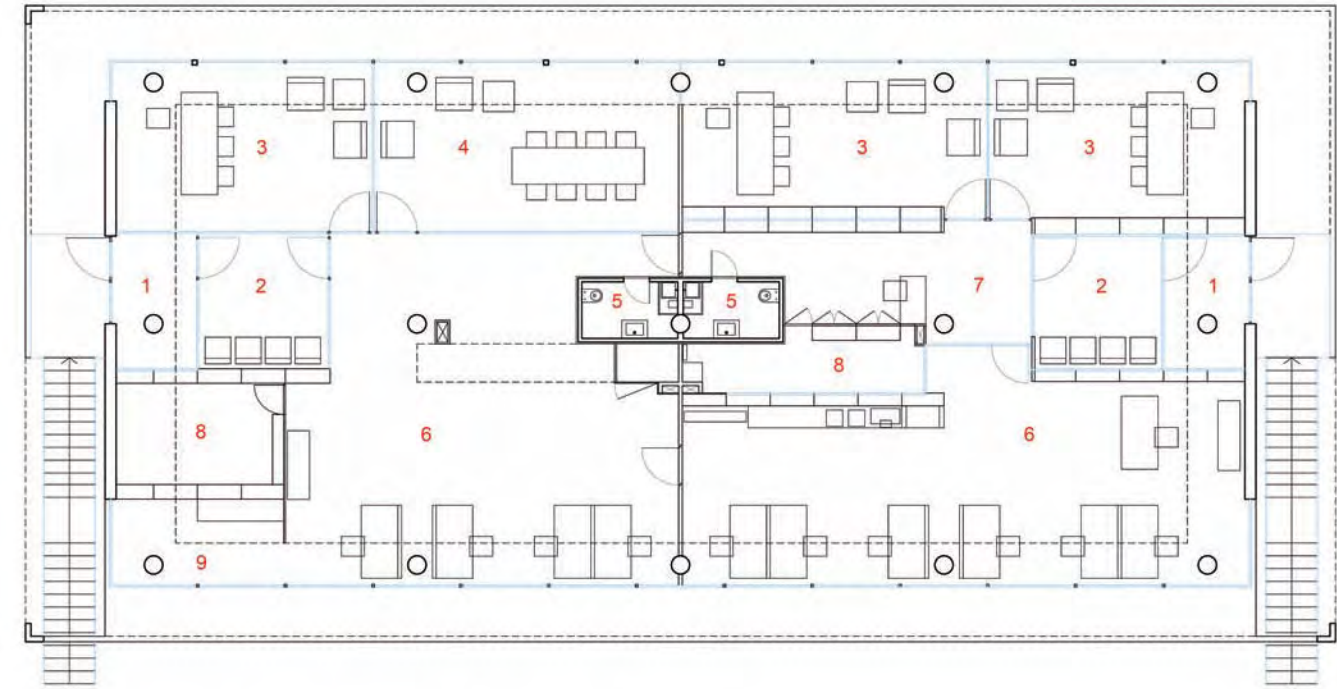

最大化利用太阳能辐射

整个建筑的主要构件、玻璃、人行道、内墙和家具全部采用边长为120厘米的模块化网格。

Made of reinforced concrete and covered in glass, this building is an example of modern architecture, with neo-baroque, neo-Moresque, Spanish and Portuguese influences. Wide overhangs protect the entire perimeter of the building's windows from the sun.

Maximizing the contribution of solar radiation

A modular grid of 120cm rules the main components of the entire construction, glasses, pavements, interior walls and furniture.
